We support you with modern software development

UX-Design

GUI-Development in QT, C++

**Cross-Platform
Development**

HTML5

**Windows-Apps
in .Net**

Christ Electronic Systems GmbH

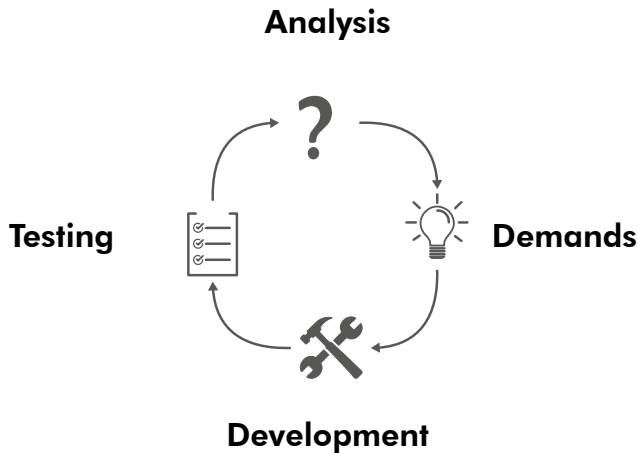

Your solution provider with system expertise.

Our motto:

110 % customer focus

We listen to you and find the right solution for your challenge.

Software-Development

Analysis:

Determination of the future user by personas

Requirements:

Requirements profile with a detailed specification of the tasks the software must perform.

Development:

Creation of an initial variant of the software solution. We program the software itself on a platform-independent basis.

Testing:

Field test after approval of the test version is performed.

Repeating the development and testing until the result meets the requirements to a satisfactory standard.

Your Benefits

- We view ourselves as a **solution provider**
